NOTES:

The CQ DX Zones of the world are shown on the map on the reverse side of this brochure.

For further information about zones consult the following website:

www.arrl.org/awards/dxcc 

For the information about zones consult the following web site: 

Note: The map of the world is based on the partitioning of the world by the IRL zones. The boundaries between zones are drawn as straight lines. The zones are designed to accommodate the ITU prefix listings.

The boundaries of CQ zones 12, 13, 29, 30, 32, 38 and 39 converge at the South Pole.

The boundaries of CQ zones 11, 14, 27, 31, 34, 36 and 40 converge at the North Pole.

The International Date Line is shown on this map.

For the 19 zones, all areas in greenfall columns are of equal areas.

For further information about zones consult the following web site:
