## Over 10,000 Icom Satellite PTT Radios Shipped Worldwide

**OSAKA, Japan (October 2021)** – The IC-SAT100/M Satellite PTT Radio manufactured by Icom Incorporated (Headquarters: Hirano, Osaka, Japan/President: Hiroshi Nakaoka) has shipped a total of over ten thousand units, as of July 2021. It has taken just two years since its global release in July, 2019 to achieve this milestone.

### What are the IC-SAT100 and IC-SAT100M Satellite PTT Radios?

Because the radio uses the Iridium® satellite network, even if terrestrial network infrastructure is rendered unusable by human or natural disasters such as flood or wildfire, it can provide a stable back-up, independent from other networks. The satellite network covers the entire earth, and can provide wide area global communications. These two kinds of rugged waterproof handheld/mobile radios are deployed by the United Nations, and many local government entities around the world.

Change in the total shipments of the IC-SAT100/IC-SAT100M

AIR. LAND. SEA.
