

FAQ

How long has Icom been making P25 radios?

For more than 10 years, Icom has been participating in industry forums for standards definition and providing radios to Public Safety agencies.

Do Icom radios support the evolving feature-set that the P25 standard offers?

Yes, with upgradeable firmware, many new features and enhancements are achievable in the products. Some features are considered options and additional purchases may be required depending upon the feature.

If my agency does not use certain features like encryption am I paying extra for unneeded features?

You have the ability to customize your order from the standard offering. You can choose DES only, AES & DES and FIPS certified as options to be installed either at the time of order or at a later date.

How rugged are the portable radios?

With industry certifications such as Ingress Protection rating of IP57 and Military Standard compliance to MIL-STD-810, Icom's portable radios are built to withstand the rugged environments of Public Safety operations.

What is the warranty for the P25 radios?

Icom offers an industry-leading 3 year warranty for P25 radio products with a 1 year warranty on accessories.

Where have Icom P25 products been sold?

Military, federal, as well as state & local public safety agencies have purchased and are currently using Icom P25 products.

Are Icom P25 products tested against industry standards?

Yes, Compliance Acceptance Testing (CAP) has verified that Icom P25 trunking radios communicate with other manufacturers of P25 equipment ensuring interoperability.

What sets Icom P25 trunking products apart from the other manufacturers?

The IC-F9011 VHF series provides 6 watts of RF output power, 1000mW (1W) of audio to the internal speaker and utilizes the latest AMBE+2 Vocoder for the best audio quality.
