## GET COMPLIANT TODAY

While staying within your budget!

ICOM® and Marlin Leasing Corporation® have joined forces to help you successfully and easily comply with the FCC's narrowband deadline.

The Federal Communications Commission (FCC) is mandating all public safety and business radio users convert existing 25 kHz radio systems to minimum narrowband 12.5 kHz efficiency technology by January 1, 2013. The purpose of the narrowband mandate is to promote more efficient use of the VHF and UHF land mobile frequency bands.

## Financing is the easiest way to get compliant!

- Financing allows you to preserve established budget allocations
- You have the ability to spread your payments out over several budget periods *(Typically, municipalities are unable to sign a non-cancelable contract. Marlin's financing programs provide a "non-appropriations" clause as part of our documentation)*
- The narrowbanding deadline is **January 1, 2013**. Work has already begun nationwide to meet this deadline
- Financing allows you to make low monthly payments to help speed up the narrowbanding process while maintaining your budget

## Who is eligible?

- State and City Governments
- School Districts
- Municipal Corporations
- Fire and Water Districts
- State Agencies
- Port Authorities
- Hospitals funded by Government Entities
- Community Colleges, State Colleges and Universities
